

FITTING GUIDE

K220 ROUND TANK SKIRTS

Parts Supplied with kit

- Quantity of tank skirts ordered
- 2 x mounting brackets per tank skirt
- Bolt kit

Tools and Equipment Required

- Small socket set
- Small spanner set
- Marker
- Drill and drill bit set
- Auto electrician, if lights are fitted

Installation Instructions

1. Identify the driver-side and passenger-side tank skirts and their fitting locations.
2. Remove the steps from the J-brackets, if they are not required.
3. Fit the mounting brackets underneath the J-brackets using the smaller supplied bolts, then fully tighten.
4. Position each tank skirt on top of the mounting bracket, with the top of the skirt touching the tank straps.
5. Using the holes in the mounting bracket as a guide, mark the mounting-hole positions on the tank skirt.
6. Remove the tank skirt and drill the marked holes.
7. Reposition the correct tank skirt and secure it using the supplied bolts. Check the alignment before fully tightening all bolts.
8. If lights are fitted, have an auto electrician connect them to the truck wiring harness.
9. Remove the protective film from both tank skirts.
