

FITTING GUIDE

K220 SQUARE TANK SKIRTS

Parts Supplied with kit

- Quantity of tank skirts ordered
- 1 x bolt kit per tank skirt

Tools and Equipment Required

- Small socket set
- Small spanner set
- Clamps
- Right-angle marker
- Drill and drill bit set
- Auto electrician, if lights are fitted

Installation Instructions

1. Identify the driver-side and passenger-side tank skirts and their fitting locations.
2. Remove the steps from the J-brackets. See the photo below.
3. Position the tank skirt on the J-brackets, with the top of the skirt touching the tank straps. Centre the skirt on the tank and clamp it securely in place.
4. Using a right-angle marker and the holes in the J-brackets as a guide, mark the mounting-hole positions on the tank skirt.
5. Remove the clamps and tank skirt, then drill the marked holes.
6. Reposition the correct tank skirt and secure it using the supplied bolts. Check the alignment before fully tightening all bolts.
7. If lights are fitted, have an auto electrician connect them to the truck wiring harness.
8. Remove the protective film from the tank skirt.
